Ji Qi, Founder, Executive Chairman and CEO of Huazhu commented: "Our China business RevPAR recovered in the second quarter to 102% of the same period of 2019, supported by strong leisure travelling demand in May but offset by relatively weak RevPAR recovery in June due to COVID-19 resurgence in Guangdong Province and traffic control in Beijing for the celebration of centenary of the Communist Party of China. RevPAR recovery momentum resumed since early July. However, unfortunately, the Delta variant of COVID-19 was again detected in Nanjing since late July, with further spreading into many other provinces and cities. The Delta variant prompted the Chinese government posed another round of strict travelling restrictions which seriously affected our performance in August. For our European business, thanks to continued progress of vaccination and easing restrictions, the RevPAR recovered to 50-60% of 2019 level during the summer holiday."

"Looking ahead," Mr. Ji continued, "uncertainties brought by the pandemic may exist for a longer-than-expected time, and we expect to be well prepared to overcome any business turbulences in the near-term. Nevertheless, in the long term, we have high confidence in China's future economic growth and think the upward trend of the China lodging industry remains intact. Therefore, we will be implementing our strategies, such as further penetration of lower-tier cities, speeding up of upper-midscale and upscale segments, organizational upgrades and talent acquisition to support our sustainable growth."

COVID-19 update

For our Legacy-Huazhu business, following the relative weak RevPAR recovery in June due to impact of COVID-19 resurgence in Guangdong Province and traffic control in Beijing for the celebration of centenary of the Communist Party of China, our RevPAR recovery momentum resumed quickly in early July. However, unfortunately, since late July, with the spread of the Delta variant from Nanjing to several provinces and cities, our RevPAR significantly dropped to only about 50% of the 2019 level as the government imposed another round of strict travelling restrictions. On the positive side, with the government's strong capability of prevention and control, daily new confirmed cases saw a significant decline recently. Many cities have recently lowered the risk level from high or middle to low level. We are expecting the recovery should resume soon after travelling restrictions are being gradually eased.

Steigenberger Hotels AG and its subsidiaries ("DH") saw an initial recovery of hotel demand along with vaccination process in Germany since the first lockdown in November 2020. As of August 23rd, 2021, about 64% of the German population have received at least one shot and 59% of the population is fully vaccinated. In August, the recovery continued with the occupancy rate reaching 50% and RevPAR recovered to 67% of 2019. However, we remain cautious on the future recovery as European governments are still carefully monitoring the situation regarding the Delta variant and a potential impact from the fourth wave. Additionally, we received and recorded a total of EUR38 million in subsidies from the German government in the second quarter, relating to the 2020 lockdown period. Meanwhile, DH is continuing to implement further cost reduction and cash flow measures, especially regarding personnel and lease costs.

Guidance

In the third quarter of 2021, Huazhu expects revenue growth to be in the range of 8%-12% compared to the third quarter of 2020, or 4%-8% if excluding DH. To provide more meaningful guidance excluding the impact of COVID-19, Huazhu expects revenue growth to be in the range of 12%-16% compared to pre-COVID-19 results in the third quarter of 2019, or revenue reduction to be in the range of 3%-7% if excluding DH.

Considering the effects of COVID-19 resurgence in Guangdong, traffic control in Beijing since late May, and the influence of the Delta variant spreading from Nanjing to several cities in China recently, we lowered our full-year revenue growth guidance. For the full year of 2021, we expect revenue growth to range from a 29% to 33%, or to range from 34% to 38% if excluding DH. To provide more meaningful guidance excluding the impact of COVID-19, Huazhu expects revenue growth to be in the range of 17%-21% as compared to pre-COVID-19 results of 2019, or to range from 2%-6% if excluding DH.

The above guidance is based on our current expectation that the recent Delta Variant of COVID-19 resurgence can be well contained by the beginning of September and there will be no massive resurgence of COVID-19 in the remaining of the year.

The above forecast reflects the Company's current and preliminary view, which is subject to change.

Use of Non-GAAP Financial Measures

To supplement the Company's unaudited consolidated financial results presented in accordance with U.S. Generally-Accepted Accounting Principles ("GAAP"), the Company uses the following non-GAAP measures defined as non-GAAP financial measures by the SEC: hotel operating costs excluding share-based compensation expenses; general and administrative expenses excluding share-based compensation expenses; selling and marketing expenses excluding share-based compensation expenses; adjusted income from operations excluding share-based compensation expenses; adjusted net income (loss) attributable to Huazhu Group Limited excluding share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities; adjusted basic and diluted earnings per share/ADS excluding share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities; EBITDA; adjusted EBITDA excluding share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities; and adjusted EBITDA margin; adjusted net income (loss) attributable to Huazhu Group Limited excluding share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities from Legacy-Huazhu; EBITDA from Legacy-Huazhu; and adjusted EBITDA excluding share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities from Legacy-Huazhu. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. For more information on these non-GAAP financial measures, please see the table captioned "Reconciliations of GAAP and non-GAAP results" set forth at the end of this release. The Company believes that these non-GAAP financial measures provide meaningful supplemental information regarding Company performance by excluding share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities that may not be indicative of Company operating performance. The Company believes that both management and investors benefit from referring to these non-GAAP financial measures in assessing Company performance and when planning and forecasting future periods. These non-GAAP financial measures also facilitate management's internal comparisons to the Company's historical performance. The Company believes these non-GAAP financial measures are also useful to investors in allowing for greater transparency with respect to supplemental information used regularly by Company management in financial and operational decision-making. A limitation of using non-GAAP financial measures excluding share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities is that share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities have been and will continue to be significant and recurring in the Company's business. Management compensates for these limitations by providing specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables have more details on the reconciliations between GAAP financial measures that are most directly comparable to non-GAAP financial measures.

The Company believes that EBITDA is a useful financial metric to assess the operating and financial performance before the impact of investing and

financing transactions and income taxes, given the significant investments that the Company has made in leasehold improvements, depreciation and amortization expense that comprise a significant portion of the Company's cost structure. In addition, the Company believes that EBITDA is widely used by other companies in the lodging industry and may be used by investors as a measure of financial performance. The Company believes that EBITDA information provides investors with a useful tool for comparability between periods because it eliminates depreciation and amortization expense attributable to capital expenditures. The Company also uses adjusted EBITDA, which is defined as EBITDA before share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities, to assess operating results of its hotels in operation. The Company believes that the exclusion of share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities helps facilitate year-on-year comparisons of the results of operations as the share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities may not be indicative of Company operating performance.

The Company believes that unrealized gains and losses from changes in fair value of equity securities are generally meaningless in understanding the Company's reported results or evaluating its economic performance of its businesses. These gains and losses have caused and will continue to cause significant volatility in reported periodic earnings.

Therefore, the Company believes adjusted EBITDA more closely reflects the performance capability of our hotels. The presentation of EBITDA and adjusted EBITDA should not be construed as an indication that the Company's future results will be unaffected by other charges and gains considered to be outside the ordinary course of business.

The use of EBITDA and adjusted EBITDA has certain limitations. Depreciation and amortization expense for various long-term assets (including land use rights), income tax, interest expense and interest income have been and will be incurred and are not reflected in the presentation of EBITDA. Share-based compensation expenses and unrealized gains (losses) from fair value changes of equity securities have been and will be incurred and are not reflected in the presentation of adjusted EBITDA. Each of these items should also be considered in the overall evaluation of the results. The Company compensates for these limitations by providing the relevant disclosure of depreciation and amortization, interest income, interest expense, income tax expense, share-based compensation expenses, and unrealized gains (losses) from fair value changes of equity securities and other relevant items both in the reconciliations to the U.S. GAAP financial measures and in the consolidated financial statements, all of which should be considered when evaluating the performance of the Company.

The terms EBITDA and adjusted EBITDA are not defined under U.S. GAAP, and neither EBITDA nor adjusted EBITDA is a measure of net income, operating income, operating performance or liquidity presented in accordance with U.S. GAAP. When assessing the operating and financial performance, investors should not consider these data in isolation or as a substitute for the Company's net income, operating income or any other operating performance measure that is calculated in accordance with U.S. GAAP. In addition, the Company's EBITDA or adjusted EBITDA may not be comparable to EBITDA or adjusted EBITDA or similarly titled measures utilized by other companies since such other companies may not calculate EBITDA or adjusted EBITDA in the same manner as the Company does.

Reconciliations of the Company's non-GAAP financial measures, including EBITDA and adjusted EBITDA, to the consolidated statement of operations information are included at the end of this press release.
